7	Any Deviation from the Minimum Inspection Schedule?		<b>X</b>	

Comments / Descriptions / Explanations
<p>One crew completed BMP operations on the C.C. 604-41-32 project site today. Wattle facing was completed for all of the remaining sections of wattle yet to be completed on the perimeter of the pad. Broadcast seeding was then completed for all disturbance associated with wattle installation within the pad area. The crew completed final cleanup and then mobilized equipment and supplies from the project site. Reclamation of the project site has been completed and the 14-day stormwater inspection will now be completed at the routine 30-day stormwater inspection cycle.</p>
