COMMENTS:

Renegade requests approval of alternative MIT for the GFTR-State #6-2 as allowed for by Rule 326.b(3) after Director consideration of any equivalent test or combination of tests.
 Renegade believes the GFTR-State #6-2 demonstrates mechanical integrity due to a 12/16/2019 bradenhead test (Doc #402271007) performed showing no bradenhead pressure and tubing/casing pressure of 60/445 psi coupled with a 9/3/2020 bradenhead test (Doc #402483300) conducted showing no bradenhead pressure and tubing/casing pressure of 60/450 psi. The GFTR-State #6-2 file which came with the well has very poor records as to the well's initial completion and cementing program. If the well lacked integrity old drilling mud would kill the well and casing pressure would not continue to build. Well pressures including the bradenhead will be monitored monthly to ensure integrity.
 This well is SI as a result of the Third Creek Gas Gathering System shutdown on 6/1/2018 and was producing at the time of SI. The GFTR-State #6-2 was produced utilizing plunger lift equipment.

Conversations with Diana Burn of the COGCC coupled with the well's circumstances has led to the belief that this filing is ripe for approval.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
