COGCC Rules(check all that apply)

1101. Installation and Reclamation  1102. Operations, Maintenance, and Repair  1103. Abandonment

Comment: COGCC Integrity Inspector on location on 2/03/2021; Inspector met with GWOC personnel on site in the process of removing (1) off location flowline previously servicing the UPRR 6 well. The well (UPRR 6) has been plugged and abandoned; cut and cap activities at wellhead are completed. The removal of the off location flowline is nearing completion; OLF (3" CS) is approximately 1960' in length and aligned in a SE direction from well to battery (also services UPRR 2). Flowline segments being pulled/ removed from ground are being cut and discarded in approved trash containers. Contract ENV personnel have screened for asbestos (coating/ neg) and are completing soils sampling/ testing at bellhole excavations. COGCC form 44 Doc #402574184 and Form 27 Doc #402585237 have been filed for the OLF removal.

Corrective Action:
