Comment Site does have extensive, nicely re-contoured Interim Reclamation areas. Approx. 1/3 of an acre at South end of Pad appears no longer needed for use. Snow cover prevented assessment of Interim Reclamation area vegetation. Site vegetation and assessment of Footprint will be conducted in growing season 2021.

Comment: Degradation of pad surface has occurred at west perimeter of Pad, south of entry and behind tank facility, where traffic has strayed from compacted traffic pattern, during wet/melt periods. The degradation/rutting (to 6") was visible through snow cover. Pad and access road conditions were frozen, snow covered, no tracking noted at time of inspection.

Corrective Action: Install or repair required BMPs per Rule 1002.f., stabilizing Pad surface, complete by 4/1/21 or as soon as thaw and weather conditions permit. Vehicle traffic should be restricted to compacted/stabilized areas.
