## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Material brought by truck from the site of spill 468756 (Remediation Project 14962) to create spreadfield will be consolidated into a single stockpile in the SE area of the spreadfield location and hauled off to a certified disposal facility. A berm will be constructed around soil stockpile for stormwater management until fully removed from location.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil underneath spreadfield footprint needs to be investigated to determine if it has been impacted. Once spreadfield material has been removed from location soil samples will be collected from each of the 19 proposed sample locations (Proposed sample location map attached). Each collected sample will be analyzed for TPH-GRO, DRO & ORO, BTEX, inorganics in soils, and metals in soils.

### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater samples will be collected from each of the proposed sample locations (Proposed sample location map attached). Each collected sample will be analyzed for BTEX.

### Proposed Surface Water Sampling

☒ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Surface water samples will be collected from each of the proposed sample locations (Proposed sample location map attached). Each collected sample will be analyzed for BTEX.

☒ Is further site investigation required?

Soil sampling of spreadfield footprint is need to determne if soil has been impacted. Groundwater samples are needed to determine if groundwater has been impacted. Surface water samples are needed to detemrine if surface water has been impacted.

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Spreadfield material will be consolidated into a single stockpile in preparation for removal. Stockpile will be hauled off location and taken to a certified disposal facility.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

If soil beneath spreadfield material is found to be impacted, excavation will be performed to remove all impacted soil. Impacted soil will be disposed of at certified disposal facility. If groundwater is found to be impacted, a groundwater monitoring plan will be submitted for review and approval to address groundwater impacts.
