Operator Comments:

- PBDT is taken from the wet shoe sub set depth
- Please utilize the "Casing" tab for actual depths as sources reference different datums, which result in a different depth.
- Top of cement calculation is based on the Contractor's cement ticket.
- No open-hole logs were run on this well. Per rule 317.p., a Resistivity log was run on the Anschutz Equus Farms Fed 5-61-34-5764B well (123-48186).
- This well has a bottom-hole location beyond the unit boundary setback. The bottom of the completed interval will be within the unit boundary. The wellbore beyond the unit boundary setback will be physically isolated and will not be completed.
- GPS measurement taken on conductor casing, prior to spud.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
