**RE: Storage Tank GP08 General Permit Approval for Application Package #367420**

Dear Dave Rebol:

The Colorado Air Pollution Control Division approves storage tank general permit registration for the oil and gas industry tank batteries listed in the table below. Please refer to general permit GP08 for all applicable requirements, limitations, terms and conditions. A copy of the general permit and oil and gas industry storage tank guidance documents may be obtained via the Internet at the following web address:

<http://www.colorado.gov/pacific/cdphe/general-air-permits>

<b>Sources approved for General Permit GP08 Coverage</b>						
<b>AIRS ID</b>	<b>Battery/Plant Name</b>	<b>Location</b>	<b>Synthetic Minor Status?</b>	<b>Liquid Stored</b>	<b>Site Specific EF Required?</b>	<b>Site Specific EF Submitted?</b>
121-0328-002	TRAVIS 1	NENW SEC14 T3S R51W	No	Produced water	No	No
121-0330-002	KINCHELOE #1	SESW SEC11 T3S R51W	No	Produced water	No	No
121-0327-002	COLORADO STATE 1, A1	NWNW SEC36, T3S, R53W	No	Produced water	No	No
121-0331-002	DAVIS WT 1,2,3	NWSE SEC30 T3S R51W	No	Produced water	No	No

The synthetic minor and site-specific emission factor status columns are provided for informational purposes and are based on the best available data provided by the applicant at the time of submittal. Please note; the applicant is responsible to be aware of changes that may affect this status and to take appropriate steps to notify the Division of these changes.

If the synthetic minor status column is marked "Yes", the operator is expected to comply with all requirements, including those specific to synthetic minor sources, contained in the general permit.

If the "Site Specific EF Required?" column is marked "Yes" and the "Site Specific EF Submitted?" column is marked "No", the operator did not submit sampling results and a site-specific emission factor with this application. In this case, sampling must be completed. Guidance on appropriate sampling and analysis methods is contained in PS Memo 14-03 Section 5 and can be found at the following web address under the 2014 Memos:

<http://www.colorado.gov/pacific/cdphe/permitting-guidance-memos>

If required in the table above, the operator shall complete sampling and determine a site-Specific emission factor within sixty (60) days of the issuance date of this approval letter.

Upon completion of sampling and determination of the site-specific emission factor, the operator shall report this information to the Air Pollution Control Division by filing a revised APEN for the storage tank. The revised APEN shall include all supporting documentation necessary to substantiate the site-specific emission factor(s) developed. Guidance on the required documentation is contained in Section 5 of PS Memo 14-03.

If you have any questions regarding this letter, please contact me directly at (303) 692-3264.

Sincerely,

Christian Lesniak  
Environmental Engineer  
Stationary Sources Program  
Air Pollution Control Division
