COMMENTS:

Renegade requests approval of alternative MIT for the Champlin 67 Amoco H#1 as allowed for by Rule 326.b(3) after Director consideration of equivalent test or combination of tests.
Renegade believes the Champlin 67 Amoco H#1 demonstrates mechanical integrity due to a 12/26/2019 bradenhead test (Doc #402273797) performed showing no bradenhead pressure and tubing/casing pressure of 620/620 psi coupled with a 10/21/2020 bradenhead test (Doc #402524456) conducted showing no bradenhead pressure and tubing/casing pressure of 710/710 psi. The Champlin 67 Amoco H#1 was completed with a sliding sleeve at 1289' and cemented with 90 sacks of cement. If the well lacked integrity old drilling mud would kill the well preventing any formation entry and casing pressure would disappear. Well pressures including the bradenhead will be monitored monthly to ensure integrity.
This well is SI as a result of Western Gas shutting down a major lateral of their Wattenberg System in 10/2018 due to a leak which up to this point they have not reactivated. The Champlin 67 Amoco H#1 was produced utilizing plunger lift equipment and was producing at the time of SI.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

Operator Comments:

This Form 4 is being filed for the Champlin 67 Amoco H#1 in response to a need for an alternative MIT approval to satisfy COGCC two year SI/MIT rule requirement. Renegade has no sense if or when Western Gas may reactivate the lateral servicing this well. Other Renegade wells with similar circumstances have had Form 4's previously approved. Conversations with Diana Burn of the COGCC coupled with the well's circumstances has led to the belief that this filing is ripe for approval.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: Jacobson, Eric Date: 2/19/2021

CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

	If well is not producing by October 21, 2022, an official MIT will need to be done.
