INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

The five wells associated with the Lamb EF Pad production facility are being plugged and abandoned. The flowlines are being completely removed and the production facility is being decommissioned. This submittal is associated with closure of one offsite well (Lamb 33-23) and its flowline. A Form 44 pre-abandonment notification was filed on 12/22/2020, at which time the surface owner and Weld County were simultaneously notified.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

One soil sample will be collected from the base of the offsite wellhead excavation. In the absence of any elevated PID readings, the soil sample will be submitted for laboratory analysis of TPH (C6-C36), BTEX, naphthalene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, pH, EC, SAR, and boron. The analytical results will be compared to COGCC Table 915-1. Soil associated with the flowline removal will also be field screened visually and with a PID. If any visual staining or any PID readings exceeding background VOC concentrations are observed anywhere onsite or at any field screening location, soil samples from those locations will also be submitted for laboratory analysis. A Soil Investigation Map is attached.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Groundwater is not expected to be encountered during P&A activities or flowline abandonment. If groundwater is encountered, one grab sample will be collected from each area groundwater has accumulated and samples will be submitted for laboratory analysis of BTEX, naphthalene, 1,2,4-trimethylbenzene, and 1,3,5-trimethylbenzene. Analytical results will be compared to COGCC Table 915-1.

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☒ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

A minimum of one soil sample will be collected from an adjacent, undisturbed location to document inorganic background concentrations. The soil sample(s) will be field screened by an independent 3rd party consultant for visual staining and VOCs will be measured with a properly calibrated PID. The soil sample(s) will be placed on hold at the laboratory.

REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

If soil impacts exceeding Table 915-1 concentrations are encountered as a result of this investigation, impacted soils will be excavated and hauled to Waste Management's North Weld Landfill, in Ault, Colorado for disposal.
