Re: #2-19 Peroulis, NW NW 19-8N-92W, Moffat Co., CO

Dear Mr. Kenney:

In response to your letter dated October 10, 1989, regarding surface restoration of the #2-19 Peroulis wellsite, Carey Resources reaffirms their completion of all plugging and restoration requirements at this location. I'm enclosing documentation to substantiate this work.

Apparently your Field Inspector observed the location of the Nor-Am #1-19 Peroulis well which was drilled and abandoned prior to Carey Resources involvement on the Peroulis lease. The referenced well was drilled less than 500 feet from the Nor-Am location. In addition to our own location, Carey Resources filled open pits, graded and cleaned up trash at two other abandoned wellsites on Mr. Peroulis' sheep range. Trash was removed and fencing repaired at the Nor-Am location as well, but it was beyond the scope of Carey Resources donated effort and expense to do a complete surface restoration of that location.

I trust the attached will adequately document Carey Resources

completion of surface restoration at the #2-19 Peroulis wellsite.
If there are any further questions, please call.

Yours truly,

Lyman A. Rudolph

12/15/86

Dear Lyman:

Merry Christmas! Where did 1986 go!!

Enclosed are the photos and reseeding data for the Peroulis location.

The bill for reseeding is \$500. which has been payed by a \$150 check from you and a \$350. check from your office. Thanks!

I have some more photos coming from another roll if the ones you see are not good enough. The dirt work that the dirt contractor did is first class.

Lets get something going!

Happy Holidays,

David Q. Tognoni
