7 7/8"	5 1/2"	15.5	5000'	Surface to lower prod zones														

* DESCRIBE LEASE

Operator proposes to drill a well to 5000' to test the Lewis "B" and Mesa verde sands. If commercial production is encountered, the well will be logged and production casing run and cemented. If the well is non-commercial, the well will be P & A as per instructions from the Oil and Gas Commission.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or reenter and operate, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

In accepting this permit the applicant agrees to fully abide by the requirements and rules of this Commission governing this permitted operation including his responsibility to prevent pollution of state waters during drilling, treating, testing, and producing operations and by the casing, cementing and plugging requirements particularly designed for the protection of state waters and the prevention of intermingling of the contents of all the various zones encountered in this permitted operation.
