**General Comment:**

On 2/19/2021, Reclamation Specialist Trujillo conducted a final reclamation and stormwater inspection at Chevron USA Inc's F V Larson B 16-X location in Rio Blanco County, Colorado.

The following compliance issues were observed during this inspection:

1002.f: Stormwater

1004: Final Reclamation

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

<b>Storm Water:</b>						
Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
	Fail					Erosion control measures
Waddles	Fail					
Seeding	Fail					
	Fail					Stormwater control measures
<p><b>Comment:</b> It was observed that stormwater and erosion control measures on the Location are missing or insufficient to stabilize the site and manage runoff per Rule 1002.f and good engineering practices.</p> <p>Wattle controls observed along western perimeter of the Location; wattle BMPs are no longer in proper functioning condition.</p> <p>Location appears to have been drill seeded; there are areas where drill seeding was conducted up the slope, rather than along the contour. This does not comport with good engineering practices and will channelize stormwater and contribute to erosion degradation. Additionally, no BMPs to stabilize the seeded soils (such as mulch) has been implemented.</p>						
<p><b>Corrective Action:</b> Comply with Rule 1002.f.(2) and install required stormwater and erosion control BMPs; ensure control measures are adequate for the site's conditions, installed in accordance with good engineering practices, and are maintained in a proper functioning condition.</p> <p>Ongoing stormwater management required until Location receives a passing final inspection.</p>						<p>Date: 03/10/2021</p>
<p><b>Pits:</b> <input type="checkbox"/> NO SURFACE INDICATION OF PIT</p>						

**COGCC Comments**

Comment	User	Date
<p><b>FINAL RECLAMATION COMMENTS</b></p> <p>Records show well PA 4/22/2020; It was observed in this inspection that all surface equipment and debris has been removed, the Location has been recontoured/regraded, and reseeded is evident.</p> <p>Location appears to have been drill seeded, however it was observed that areas on the slopes of the Location where drill seeding did not occur, and Reclamation Specialist was unable to observe evidence of broadcast seeding; Uniform seeding activities do not appear to have been conducted on the Location.</p> <p>Pursuant to Rule 1004.a, all final reclamation activities are required to be completed by 4/22/2021, though every effort shall be made to complete reclamation before the next local growing season. A followup inspection will be conducted to determine compliance with 1004 rules, and if uniform revegetation activities have been performed on the Location by 4/22/2021.</p>	trujilloam	02/23/2021
