Comment Location has been reduced to areas reasonably needed for production. Interim areas appear to be progressing towards COGCC 1003 standards; areas on the northwest corner (pipeline disturbance) may require additional seeding. Vegetation (shrub, grass) establishment on northern slopes is uniform though evidence of heavy grazing pressure on interim areas were observed

Comment: Wattles BMPs observed on the northwest corner showing signs of disrepair. Pad and access road stabilized with gravel; tracking issues observed are minor and off-location sediment transport not observed.

BMPs on Location appear adequate for site's conditions and are in proper functioning condition at time of inspection.

Continue stormwater and erosion management on Location.
