## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	See attached	Lab Analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Please see COGCC Document 402537238 for a description of activities completed prior to 1/8/2021.

Please see the attached document for a summary of activities completed on 1/8/2021.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples will be used to 1) Delineate the impacts associated with the dumlaine release (Spill/Release Point ID 478578) and 2) Confirm the successful removal of the impacts described above. All samples will be submitted for laboratory analysis of all analytes listed in COGCC Table 915-1. Please see the attached document for additional information including a diagram of proposed sampling points included as Figure 3 and a procedure to be followed during work associated with item #2 above.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)         

Volume of liquid waste (barrels)         

Is further site investigation required?

Soil impacts below the tank battery need to be delineated. This will be completed through potholing using a hydrovac and/or a mechanical excavator. Please see the attached document for additional information including a diagram of proposed sampling points included as Figure 3.

# REMEDIAL ACTION PLAN

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The source was a failed dumpline which will be replaced.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

The initial remediation plan includes the removal of impacted soil to a depth to be determined using safety and landowner considerations. Soil will either be transported offsite for landfill disposal or landfarmed on site. Please see the attached document for additional information.
