## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
No	SOILS	No known impacts are present	Field screening via PID and EC meter

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

After removing the onsite equipment and prior to backfilling any open excavations each area (below tanks, separator, well head, gas sales meter, flowlines, combustor, flare, and any other areas discovered during site inspection) will be field screened via visual inspection, PID, and an EC meter. At a minimum one grab sample will be collected (regardless of field screening results) from the following locations (see site map): below all of the AST's (one produced water tank and three crude oil tanks), well head, flowline trench, and the separator) and submitted for laboratory analysis. Soil samples in areas that demonstrate evidence of a release will be analyzed for Table 915-1 to confirm that any potential impacts are < Table 915-1 Concentrations Levels. In the absence of evidence of a release, soil samples will be analyzed for TPH (C6-C36), BTEX, 1,2,4-trimethylbenzene, and 1,3,5-trimethylbenzene. In areas where produced water was stored, transported, or processed soil samples will be analyzed for the soil suitability parameters pH, EC, SAR and boron in addition to the above parameters.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

A minimum of 7 grab samples will be collected during the site assessment as described in the initial action summary section. In the event no elevated field screening are observed from these 7 areas the area most likely to be impacted based upon facility layout will be collected and submitted for lab analysis. In addition, while field screening the remaining site if evidence of a release has occurred more samples will be collected as described above.

### Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Additional Investigative Actions
