Comment: **The cattleguard and pipe have been removed. It appears mulch was applied to areas of the location. There are areas of the location which have not established vegetation and soils appear to be compacted. Vegetation will not establish in compacted soils. Soils needs to be decompacted by cross ripping to 18 inches. The area along the fill slope is compacted and should be graded to match the contours of the terrain. There is a power pole that needs to be removed at the southwest side of the location.**
