RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

On 03/03/2021, Colton conducted a bradenhead test as an alternative method to demonstrate mechanical integrity. The bradenhead test is filed on a Form 17, document number: 402621112. The Bradenhead on the McLennan State A-1 did not have enough pressure to register on a gauge, and when opened there was a very slight whisper to dead in less than 1 second. There are no fluids present at the open bradenhead valve. The tubing pressure during the test was 510 psi and the production casing pressure during the test was 680 psi. Neither pressure changed during the test. The stable pressure inside the wellbore and lack of pressure on the bradenhead is evidence that there is mechanical integrity of the wellbore and effectively demonstrates what an MIT would. The well is currently shut in, leasehold HBP and frequently monitored by the pumper for any changes that would indicate an issue with the wellbore.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

Operator Comments:

In response to Warning Letter 402493088, and correspondence with COGCC Engineering, Colton LLC requests approval of this alternative method for demonstrating mechanical integrity as a measure to grant an extension of the corrective action deadline of one year to March 31, 2022.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
