Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On March 4, 2021, a small amount of product misted off location during hot oiling operations at the Newby State 36N-4HZ wellhead. The release has been controlled. The volume of the release is approximately one quart. Assessment activities are ongoing, and the assessment details will be summarized in a supplemental report. The topographic Site Location Map showing the geographic setting of the release is provided as Figure 1.
