Photo 1. View of the project area from the well pad entrance facing center.

Photo 2. View of the eastern fill slope from the southeastern corner facing northward. Revegetation is largely dormant, but comprised of western wheatgrass, rubber rabbitbrush, and crested wheatgrass.

Photos 3. View of partially dormant musk thistles observed on the well pad. Approximately 15 individuals observed.

Photo 4. View of the reference area comprised of sagebrush shrubland, cleared grass field mosaic, with western wheatgrass in the understory. Herbaceous vegetation is largely dormant at this time.

Photo 5. View of closed gates after leaving location.
