Craig, Aaron,

i. Per our discussion TEP plans to plug back the RG 543-18-297 well due a parted mud motor left in the hole. Equipment left in hole was the rotor, lower half of mud motor and drill bit. After two failed fishing attempts the decision was made to plug back and perform sidetrack operations. TEP is requesting approval to execute the following plug back and sidetrack plan. Once you review, please respond with an email providing verbal approval to proceed with the Form 2 submission and expedited approval. Thanks for the help on this and please call with any questions.

ii. Original Hole TD 8894' MD

iii. 9 5/8" 36# J55 LTC Surface casing set 3360.5' MD

iv. Fish in the hole – Mud motor and 8 3/4" PDC bit

Fish bottom MD - 8894'

Top of fish MD - 8860'

v. Cementing procedure and plug depths – Attached

- vi. Cementing procedure and plug depths – Attached
- vii. Sidetrack KOP – 7961' MD - wellbore diagram – Attached
- viii. Objective formations with the new well bore are same as permitted.
- ix. No changes to the BHL – Same as permitted
