

# Ohmm™ Hash Generator\*

*Natural gas powered bitcoin mine*

## Features

- Automated - PLC, remote control
- Responsive - load follows fuel availability
- Powerful - engine overdrive options
- Data - engine diagnostics and charting
- Optimize - louver adjustable air flow
- Callouts - text / email alarms
- Portable - plumb and play

## Options

- 50 - 400 kW generator packages
- Engine overdrive / overclocking
- Sound proofing
- Cellular LTE or satellite internet

*"Our proprietary\* Hash Generator conveniently houses the natural gas engine, generator and bitcoin mining datacenter all within the same weatherproof enclosure. Completely turn-key, all that is needed is a natural gas source and you're ready to mine! The optional control system cycles the load up or down in response to fuel availability to ensure uptime and hashrate are maximized while also minimizing vented or flared natural gas. The operator can start / stop the engine remotely and even change the circuit sequencing all from the convenience of a phone or laptop.*
