General Comment:**COGCC Inspection Report Summary**

On Wednesday 3/24/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus N32, at Location # 334856 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls.

During this inspection the following possible compliance issues were observed:

1. Tank battery signage does not meet requirements of new rule 605.e
2. Location and access road show signs of lack of stabilization/compaction
3. Evidence of tracking onto County Road 315 from access road and possibly from location as that there is no evidence of tracking controls as stated in the provided document (BMP's for sediment tracking controls) from the operator.
4. 4 dead men improperly marked.
5. Debris on location

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
