**Detailed Description of Accident:**

- Do not include names of injured, injuries, or medical treatment information.
- Subsequent Report must include Root Cause.

Location was checked by operator and all was good at approximately 5pm on 03/25/2021. At 05:46am on 03/26/2021 the local fire department was called out for oil tank on fire. Please see the attached report from Southwest Washington County Volunteer Fire Department. No water or foam was used and the fire was allowed to burn itself out. High relative humidity and wet ground from recent rain kept the fire from spreading off location. Root Cause investigation is ongoing as the tank was too hot to evaluate on 03/26/2021. Please see the attached pictures from 03/26/2021 of the location, tank, well and surrounding ground. The tank integrity was not breached and there was no oil or water spilled inside or outside of containment. Initial thoughts are that vandalism may be the root cause however a subsequent report including root cause will be submitted in a couple days.
