**General Comment:****COGCC Inspection Report Summary**

On Tuesday 3/30/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a follow up inspection at Caerus L5E, at Location # 323948 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls. Some of the C/A's from previous inspection document # 700702474 have not been completed, although C/A date for compliance is 5/25/2021 for said compliance issue. A follow up inspection for the C/A not completed will be done on or around said date. Gravel has been added to entrance of access road from CR 315, approx. 90 feet long, 50 foot wide and 3 to 4 inches deep. Lease road has been graded. All inventory of location remains the same as previous inspection.

During this inspection the following possible compliance issues were observed:

1. Tank battery signage does not meet requirements of new rule 605.e

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
