COMMENTS:

This Sundry is being submitted to address a historic incident that is being identified as an "unresolved spill/release" in COGCC COGIS database. The incident is being associated with Location ID 413720 which is an active Grizzly Operating location and Facility ID 412569 which is an injection well on the referenced location. The incident is being identified as an "unresolved spill/release" associated with the former operator Highpoint Operating Corporation (formerly known as Bill Barrett Corporation) and their assigned Operator Number 10071. This incident occurred on April 2, 2011 and the Form 19 can be referenced under COGCC Document Number 2213234 which is also the COGCC Spill Number.

Grizzly Operating was able to locate historical documentation which indicates that Bill Barrett Corporation was requesting closure of this incident. This incident pre-dates the current eForm system and all documents were sent via email to the assigned Environmental Protection Specialist for review and processing during this time. Grizzly Operating was unable to locate a copy of the submittal email. Per Rule 915.f, Grizzly Operating is requesting COGCC approval that version of Table 910-1 be considered for this historic incident, as Table 910-1 was in effect at the time the incident occurred. The referenced historical documentation has been attached to this submittal and Grizzly Operating is formally requesting that the incident being identified in the COGIS database as an "unresolved spill/release" be closed and given a No further Action determination by the COGCC.

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: FISCHER, ALEX Date: 3/30/2021

CONDITIONS OF APPROVAL, IF ANY:

<u>COA Type</u>	<u>Description</u>
	Ballast material removed from the tank battery shall be considered E&P waste and disposed at an approved facility.
	Any modifications of the tank battery resulting in the removal of equipment, liner replacement, tank battery configuration, etc. The Operator shall submit an F27 Site Investigation and Remediation Plan for approval prior to the modifications.
	SEE 19A DOC #200449603 Based on a review of the information provided, it appears that no further action is necessary at this time and COGCC approves the closure request. Should conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards, or, if groundwater is found to be significantly impacted, further investigation and/or remediation activities may be required at the site. Final Reclamation should comply with 1000 Rules. Location and Tank Battery Facility closure shall meet Table915-1 cleanup standards Protection of Groundwater Soil Screening Level Concentrations.
