1003 f. Weeds Noxious weeds? I

Comment

It was observed in this inspection that the pad has been reduced to areas reasonably needed for production; vegetation over the majority of the interim areas appears to be progressing towards a uniform desirable perennial vegetative establishment in accordance with COGCC 1003 Rules; interim areas on the northeast end of the Location may require additional seeding to facilitate reclamation.

Cheat grass establishment observed throughout interim areas; continue with ongoing weed management in order to keep the Location free of species considered undesirable and noxious pursuant with Rule 606.c and 1003.f.
