Comment:

Operator has performed final reclamation activities. There is the establishment of desirable perennial vegetation; however, there is not uniform establishment that is reflective of reference area vegetation. Refer to the attached inspection photos.

Operator may consider additional final reclamation activities (i.e., additional seeding) to help progress reclamation and achieve uniform vegetative cover.

Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. Operator shall submit a Form 4 Final Reclamation Complete notice when the location meets Rule 1004 standards.
