Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	See Attached Data	Soil Samples / Lab Analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Pumper arrived on location during his normal route 12/1/2018 and discovered that there was a ~100'x60' area with 1" of produced water with skim oil standing behind the pumping unit. The pumper quickly shut down all wells that flowed into the pipeline and the leak was stopped. The lease was shut in until roustabout crews arrived on 12/3/2018 and found/repared the failure. A 45-degree fitting ruptured from improper installment. A new fitting was installed, and wooded stakes were installed to reinforce the 45 degree fitting to help with any future ground shifting.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

On April 4, 2019, four samples (SS01@6-12", SS02@6-12", SS03@6-12", SS04@6-12") were collected from soil borings inside of the impacted area originally noted the initial form 19 to delineate the spill. Lab analysis was conducted for TPH-GRO, TPH-DRO, Benzene, Toluene, Ethylbenzene, Xylenes, EC, and PH). Laboratory analytical results indicated that all samples are in compliance with the COGCC Table 910-1 except for SS03 which was out of compliance for TPH-DRO levels (711 mg/kg). The excavation site map depicting the soil sample locations is attached as Figure 2. The soil sample analytical results are summarized on Table 1. In accordance with rule 910(3)D, as the EC values are in compliance with COGCC Table 910-1, SAR analysis was not completed.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

### Soil

Number of soil samples collected 4  
Number of soil samples exceeding 910-1 1  
Was the areal and vertical extent of soil contamination delineated? Yes  
Approximate areal extent (square feet) 0

### NA / ND

-- Highest concentration of TPH (mg/kg) 711  
NA Highest concentration of SAR           
BTEX > 910-1 No  
Vertical Extent > 910-1 (in feet) 0

### Groundwater

Number of groundwater samples collected 0  
Was extent of groundwater contaminated delineated? Yes  
Depth to groundwater (below ground surface, in feet)           
Number of groundwater monitoring wells installed           
Number of groundwater samples exceeding 910-1         

Highest concentration of Benzene (µg/l)           
Highest concentration of Toluene (µg/l)           
Highest concentration of Ethylbenzene (µg/l)           
Highest concentration of Xylene (µg/l)           
Highest concentration of Methane (mg/l)         

### Surface Water

0 Number of surface water samples collected  
         Number of surface water samples exceeding 910-1  
If surface water is impacted, other agency notification may be required.

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)          Volume of liquid waste (barrels)         

Is further site investigation required?

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

As the laboratory analytical results showed, all soil samples except for SS03 (TPH-DRO) were in compliance with COGCC table 910-1. PO&G Operating proposes to conduct an in-situ bioremediation of the impacted soil for TPH and not remove any soil.

## REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

As all samples are in compliance with COGCC table 910-1 allowable limits except for SS03 TPH-DRO value of 711 mg/kg. PO&G Operating proposes to conduct an in-situ bioremediation of the impacted soil. As SS03 resulted in a value of TPH-DRO 711 mg/kg, it is highly likely that by utilizing the soils natural properties along with applying Revive O to help speed up the process (Attachment 1), that the value of the TPH-DRO will be able to drop below the allowable concentration of 500 mg/kg given enough time. Revive O is a biodegradable dispersant that does not contain bacteria, but rather changes the wettability allowing the hydrocarbons to be broken down easier. The plan is to aerate the soil and apply Revive O after given approval from the COGCC. As all other quadrants of the impacted area were in full compliance with COGCC Table. PO&G Proposes that all other quadrants be alleviated from any further testing, and that the SS03 quadrant be tested every 180 days for TPH-DRO to check the status of the remediation.

## Soil Remediation Summary

In Situ

Ex Situ

Yes \_\_\_\_\_ Bioremediation ( or enhanced bioremediation )  
\_\_\_\_\_ Chemical oxidation  
\_\_\_\_\_ Air sparge / Soil vapor extraction  
\_\_\_\_\_ Natural Attenuation  
\_\_\_\_\_ Other \_\_\_\_\_

\_\_\_\_\_ Excavate and offsite disposal  
\_\_\_\_\_ If Yes: Estimated Volume (Cubic Yards) \_\_\_\_\_  
\_\_\_\_\_ Name of Licensed Disposal Facility or COGCC Facility ID # \_\_\_\_\_  
\_\_\_\_\_ Excavate and onsite remediation  
\_\_\_\_\_ Land Treatment  
\_\_\_\_\_ Bioremediation (or enhanced bioremediation)  
\_\_\_\_\_ Chemical oxidation  
\_\_\_\_\_ Other \_\_\_\_\_

## Groundwater Remediation Summary

\_\_\_\_\_ Bioremediation ( or enhanced bioremediation )  
 \_\_\_\_\_ Chemical oxidation  
 \_\_\_\_\_ Air sparge / Soil vapor extraction  
 \_\_\_\_\_ Natural Attenuation  
 \_\_\_\_\_ Other \_\_\_\_\_

## GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

# REMEDIATION PROGRESS UPDATE

## PERIODIC REPORTING

Frequency:  Quarterly  Semi-Annually  Annually  Other 180 days

Report Type:  Groundwater Monitoring  Land Treatment Progress Report  O&M Report

Other impacted soil

## WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? \_\_\_\_\_

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards \_\_\_\_\_

E&P waste (solid) description \_\_\_\_\_

COGCC Disposal Facility ID #, if applicable: \_\_\_\_\_

Non-COGCC Disposal Facility: \_\_\_\_\_

Volume of E&P Waste (liquid) in barrels \_\_\_\_\_

E&P waste (liquid) description \_\_\_\_\_

COGCC Disposal Facility ID #, if applicable: \_\_\_\_\_

Non-COGCC Disposal Facility: \_\_\_\_\_

## REMEDIATION COMPLETION REPORT

### REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No \_\_\_\_\_

Do all soils meet Table 910-1 standards? No \_\_\_\_\_

Does the previous reply indicate consideration of background concentrations? \_\_\_\_\_

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? \_\_\_\_\_

Does Groundwater meet Table 910-1 standards? Yes \_\_\_\_\_

Is additional groundwater monitoring to be conducted? No \_\_\_\_\_

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

As all samples are in compliance with COGCC table 910-1 allowable limits except for SS03 TPH-DRO value of 711 mg/kg. PO&G Operating proposes to conduct an in-situ bioremediation of the impacted soil. As SS03 resulted in a value of TPH-DRO 711 mg/kg, it is highly likely that by utilizing the soils natural properties along with applying Revive O to help speed up the process (Attachment 1), that the value of the TPH-DRO will be able to drop below the allowable concentration of 500 mg/kg given enough time. Revive O is a biodegradable dispersant that does not contain bacteria, but rather changes the wettability allowing the hydrocarbons to be broken down easier. The plan is to aerate the soil and apply Revive O after given approval from the COGCC. As all other quadrants of the impacted area were in full compliance with COGCC Table. PO&G Proposes that all other quadrants be alleviated from any further testing, and that the SS03 quadrant be tested every 180 days for TPH-DRO to check the status of the remediation.

Is the described reclamation complete? No \_\_\_\_\_

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim?  Final?

Did the Surface Owner approve the seed mix? \_\_\_\_\_

If NO, does the seed mix comply with local soil conservation district recommendations? \_\_\_\_\_

# IMPLEMENTATION SCHEDULE

## PRIOR DATES

Date of Surface Owner notification/consultation, if required. 12/01/2018

Actual Spill or Release date, if known. 12/01/2018

## SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). \_\_\_\_\_

Date of commencement of Site Investigation. \_\_\_\_\_

Date of completion of Site Investigation. \_\_\_\_\_

## REMEDIAL ACTION DATES

Date of commencement of Remediation. 05/26/2019

Date of completion of Remediation. 05/26/2020

## SITE RECLAMATION DATES

Date of commencement of Reclamation. \_\_\_\_\_

Date of completion of Reclamation. \_\_\_\_\_

## OPERATOR COMMENT

Per Rule913.e.(2) - P.O.&G. Operating is requesting to the previously approved timeline for this remediation.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Signed: Wendy Colotta

Title: Regulatory Analyst

Submit Date: 04/06/2021

Email: wendy\_colotta@pogresources.com

Based on the information provided herein, this Application for Site Investigation and Remediation Workplan complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: Jason Kosola

Date: 04/12/2021

Remediation Project Number: 13683

## Condition of Approval

### COA Type

### Description

1 COA	Original sampling timeline of 180 days is approved. Operator shall conduct follow up sampling of bioremediation area no later than 06/30/2021. Operator shall submit analytical results and summary table no later than 10 days after receipt of analytical results.
