**COMMENTS:**

On 8/21/2013, a 2.5 barrel (bbl) produced water and 0.5 bbl condensate release occurred when a pressure safety valve (PSV) tripped. On 8/27/2021, three grab samples were collected from the release area. Samples collected from the point of release (SPILL POR) and western terminus of the spill (SPILL W) were analyzed for full COGCC Table 910-1 analysis. The sample collected from the middle of the spill (SPILL MID) was analyzed for BTEX and TPH. Laboratory results indicate concentrations that are either compliant with COGCC Table 910-1 Concentration Levels or within background concentrations observed near the site. Based on these results, no additional investigation or remediation activities were warranted. A Topographic Map depicting background sample locations is attached with laboratory reports of soil samples collected from the spill and background sample. Field notes detailing sampling activities on 8/27/2021 are also attached.

**H2S REPORTING**

Operator Comments:

This eForm 4 was prepared for the administrative closure of COGCC Spill Document #2216546. Based on laboratory results of spill characterization samples collected on 8/27/2021, no additional investigation or remediation activities appear to be warranted. Caerus respectfully requests a no further action determination regarding this spill.

Caerus requests to utilize COGCC Rule 915.f. for the project to be completed prior to January 15, 2022.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
