COGCC Comments		
Comment	User	Date
As outlined on COGCC form 19 spill report Doc #402652706 received on 04/08/2021: Potential impacts to soil were observed beneath the partially buried produced water tank during facility closure activities on April 8, 2021, at approximately 9:00 am. The release is completely contained on-site, neither surface water nor groundwater were impacted, no injuries occurred as a result of the release, and cleanup is ongoing. No flowlines were observed in the open excavation in the area of the produced water tank.	maclarej	04/14/2021
