General Comment:

COGCC Inspection Report Summary

On Thursday 4/15/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at Caerus I9W, at Location # 334585 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Operator (Caerus) has provided documentation of their Best Management Practices for Sediment Tracking Controls. Location and access road have been bladed and gravel (approximately 30 foot wide and 25 foot in length) has been placed at entrance of access road at pavement.

During this inspection the following possible compliance issues were observed:

1. Tank battery signage does not meet requirements of rule 605.e
2. Location still shows signs of lack of stabilization/compaction
3. Holes in tank battery containment

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
