Impacted Media (Check all that apply) ☒ Soil ☐ Groundwater ☐ Surface Water ☐ Dry Drainage Feature

Surface Area Impacted: Length of Impact (feet): 75 Width of Impact (feet): 75

Depth of Impact (feet BGS): _____ Depth of Impact (inches BGS): _____

How was extent determined?

Field observation and confirmation soil sampling.

Soil/Geology Description:

SP - pad roadbase.

Depth to Groundwater (feet BGS) 33 Number Water Wells within 1/2 mile radius: 1

Further scraping was conducted to remove the TPH impact identified in sample SS07@0-6". The final extent of scraping was approximately 6 feet by 15 feet to a total depth of 18 inches bgs. The excavated impacted material was transported offsite to a permitted

facility for disposal and the waste manifests are available upon request. On March 29, 2021, one confirmation sample (SS07@18") was collected at the location of the prior exceedance. The sample was collected into a laboratory provided glass jar and delivered with a completed chain of custody to an accredited lab for TPH analysis. Analytical results indicated that SS07@18" was compliant with applicable COGCC Table 910-1 standards which confirms the previously identified impact was successfully removed.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
