Comments:

Attention Chris Binschus:  
A Form 10 Change of Operator document has been submitted for the well to reflect PDC acquisition of the site. The centralized facility is permitted separately (Loc ID 465076) and served the Aufrecht # N02-09 and Aufrecht N # 02-10 wells. This site was accessed via a preexisting crop divide road, which remains in place for its historic purpose. All portions of the access road specific to the AUFRECHT N 2-16 Well have been reclaimed and returned to cropland. Some segments of the access road show signs of the two track leading to the well, but grass hay and alfalfa has established within these regions and there is no indication of compacted soils. Autotoxicity often observed in small seeded areas within established alfalfa fields is the likely cause of the difference in vigor. The land owner has used a combination of grass has with alfalfa in these areas to ensure consistent overall harvest quality for the field. Please see the attached report for additional reclamation activities, details on the completed vegetation assessment, and photo documentation.
