Flowline System

The Flowline Report, Form 44, shall be submitted to register, report realignment, report removal from service, provide pre-abandonment notices, or report abandonment of Off-Location Flowlines, Flowline Systems, Produced Water Transfer Systems, or Crude Oil Transfer Lines or Systems as required by the 1100 Series Rules. The Form 44 shall also be submitted to register, report realignment, or report abandonment of Domestic Taps, and to report Grade 1 Gas Leaks from Flowlines per Rules 610 and 906.

Operator Information

OGCC Operator Number: 8960 Contact Person: Fred Kayser

Company Name: BONANZA CREEK ENERGY OPERATING COMPANY LLC Phone: (970) 3964900

Address: 410 17TH STREET SUITE #1400 Email: flowlines@bonanzacrk.com

City: DENVER State: CO Zip: 80202

Is the Operator a Tier One member of the Utility Notification Center of Colorado (CO811) that participates in Colorado's One Call notification system? Yes ☒ No ☐

FLOWLINE SYSTEM

FLOWLINE SYSTEM IDENTIFICATION

Facility ID Number: 478703 Flowline System Name: Bonanza Creek Flowlines

FLOWLINE SYSTEM REGISTRATION

A representative legal location and associated latitude and longitude near the center of the Flowline System.

County: WELD

Qtr Qtr: SENE Section: 26 Township: 5N Range: 63W Meridian: 6

Latitude: 40.371670 Longitude: -104.396120

GPS Quality Value: Type of GPS Quality Value: Measurement Date: 09/12/2013

FLOWLINE DESCRIPTION AND TESTING

Date Construction Completed: 09/15/2020

Pipe Material: Carbon Steel Bedding Material: Native Materials

Max outer Diameter (inches): 2.000 Type of Fluid Transferred: Multiphase

Max Anticipated Operating PSI: 200 Testing Pressure: 2210 Test Date: 09/06/2020

Description of Corrosion Protection:

The potential for internal corrosion in the piping is addressed by sweeping any liquids, mainly water, out of the pipe by pigging the line twice monthly.

External corrosion potential is addressed by ensuring that all buried lines have external coating, with shrink sleeves installed on larger pipe bare joints, and taped joints on smaller pipe. All external pipe coating is tested "jeeped" prior to being installed in ditch.

Galvanic Anodes are frequently installed with buried piping, and flange isolation kits are strategically used where necessary, to optimize effectiveness of cathodic protection.

Description of Integrity Management Program:

BCEOC has a Flowline Integrity Management Plan in place, dated October 2020 that is in compliance with the COGCC 1100 series flowline rules. See original registration.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

The majority of flowlines are not near any known and defined public receptors or road crossings. Those that are, county permits are acquired prior to construction of county road crossings. Permit conditions contain minimum construction requirements.

There are no flowlines installed near any known sensitive wildlife habitats.

FLOWLINE SYSTEM PRE-ABANDONMENT NOTICE

Date: 03/23/2021

Pre-Abandonment 30-day Notice

- ☒ Removed per Rule 1105.d.(2)
- ☐ Abandoned In Place per Rule 1105.d.(2) Exceptions - select all that apply:
- ☐ A. A surface owner agreement executed by a surface owner allows abandonment in place.
 - ☐ B. The line is subject to the jurisdiction of the federal government, and the relevant federal agency directs abandonment in place.
 - ☐ C. The flowline or crude oil transfer line is co-located with other active pipelines or utilities or is in a recorded right of way.
 - ☐ D. Removal of the line would cause significant damage to natural resources, including wildlife resources, topsoil, or vegetation.
 - ☐ E. The flowline or crude oil transfer line is in a restricted surface occupancy area or sensitive wildlife habitat.
 - ☐ F. The flowline or crude oil transfer line or a segment of the line crosses or is within 30 feet of a public road, railroad, bike path, public right of way, utility corridor, or active utility or pipeline crossing.
 - ☐ G. The flowline or crude oil transfer line or a segment of the line crosses or is within 30 feet of or from under a river, stream, lake, pond, reservoir, wetlands, watercourse, waterway, or spring.
 - ☐ H. The operator demonstrates and quantifies that the removal of the flowline will cause significant emissions of air pollutants.
- ☐ Abandoned In Place per Rule 1105.d.(3)

Description of Pre-Abandonment Notice:

Will fully remove two flowlines: NP 44-11-28 WH Line and NP 44-11-28/1/SG Line from the North Platte 44-11-28HZ Facility (location ID 331805) to the North Platte 44-11-28HZ (location ID 423850).

The subreport 'Submit' could not be found at the specified location \\DNRWBP004\eFormReports\Form44\44 submit.rdlc.
