General Comment:

spill 468756 closed based on actions to be undertaken as part of site investigation and remediation project 14962.
 as part of project 14692 operator has stated the following
 "Top 3 feet of excavation area will be backfilled with soil appropriate to revegetate area with surface owner approved seed mix. Any area impacted by remediation work will be cross ripped, crimped with straw, and seeded using surface owner approved seed mix."
 excavation partially
 attached photo indicates reclamation process has been initiated with some grasses growing along route used for truck and heavy equipment access to excavation
 Access route was to left of attached photo and parallel to and to right (east) of north south fence line
 This is not a reclamation inspection but simply observation that reclamation work stated as to occur has been initiated with site investigation and remediation project 14962 closed.
