**COMMENTS:**

On 3/10/2021, a Form 17 was completed with a beginning pressure of 1 psi and an ending pressure of 0 psi. Gas was present at the beginning of the test but was not continuous. Due to this well not having full surface casing isolation of the Fox Hills, we would like to add this well to our Abatement program. We will install automation, monitor, and blow down as needed for a period of 6 months, ending 9/10/2021. No mitigation measures have occurred to date, the blow downs will begin after email communication with the COGCC engineer
