General Comment:**COGCC Inspection Report Summary**

On Tuesday 4/27/2021 at approximately 1100, I, Inspector Scott Ramsey, conducted a routine inspection at TEP KP 22-22, at Location # 420972 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Also location is within or in close proximity to the 411 water protection area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for tracking pad.

During this inspection the following compliance issues were observed:

1. Location and access road show signs of lack of stabilization/compaction
 2. No tank battery signage
 3. Master valve leaking paraffin/stained soil
 4. Casing master valve leaking gas, called operator and they were sending someone out to repair
- Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
