**OPERATOR COMMENTS AND SUBMITTAL****Comments**

Distance from completed portion of the wellbore to nearest wellbore permitted or completed in the same formation was measured to the proposed Wakeman 20-17-1NAH in 3D.

Distance from the proposed wellbore to nearest existing or proposed wellbore belonging to another operator, including plugged well was measured to the Plugged and Abandoned Amaco 24-17 (API No. 05-001-08882) owned and operated by Extraction Oil & Gas Inc.

This well has a bottom-hole location beyond the unit boundary setback. The bottom of the completed interval will be within the unit boundary setback at 460' FNL and 1,648' FWL of Section 17. The wellbore beyond the unit boundary setback will be physically isolated and will not be completed.

The Wakeman Pad Form 2A OGLA is valid until 01/24/22; therefore, an OGDG is not required.

This is a refile Form 2. This location has not been built. Minor changes have been made to this permit. The OWE and distances have been reviewed and revised.

Distance to the nearest public road has been updated with a corrected distance.

Notices were sent to all parcels within 1/2 mile of the property line that the pad is proposed on during the Adams County permit process. The Operator held a neighborhood meeting on May 17, 2018.

## Best Management Practices

<b>No</b>	<b>BMP/COA Type</b>	<b>Description</b>
1	Drilling/Completion Operations	Wellbore Collision Prevention -Rule 408.t: Prior to drilling operations, Operator will perform an anti-collision evaluation of all active (producing, shut in, or temporarily abandoned) offset wellbores that have the potential of being within 150 feet of a proposed Well prior to drilling operations for the proposed Well. The Operator will give notice to all offset Operators prior to drilling.
2	Drilling/Completion Operations	Alternative Logging Program: One of the first wells drilled on the pad will be logged with Open Hole Resistivity Log and Gamma Ray Log from the kick-off point to into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "Alternative Logging Program - No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
