Description of Corrosion Protection

Extraction's corrosion procedures are detailed in its Flowline Management SOP. Coating materials will be used that minimize internal and external corrosion, such as internally coated pipe or stainless steel for water service, and externally coated FBE on all buried steel pipe. If flowlines are repaired due to corrosion, Extraction will investigate the failure, promptly respond with the appropriate remedial actions and determine the root cause and apply corrective actions as necessary. Extraction retains records of its chemical program in the form of Failure Analysis Reports, records of chemical invoices and chemical delivery.

Description of Integrity Management Program

Extraction's integrity management program is detailed in its Flowline Management SOP, which covers flowline installation, operation, maintenance, inspection, testing, and repairs. Prior to beginning any project involving flowlines, Extraction ensures the project plans, flowline installation, flowline maintenance (including repairs) and all flowline inspection and testing projects meet the requirements of the Flowline Management SOP. All pressure tests on flowlines will be conducted by an independent, third party qualified to do such testing. Precautions shall be taken to protect employees and the general public.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

N/A.

Flowline Description and Testing

Type of Fluid Transferred: Multiphase Pipe Material: Carbon Steel Max Outer Diameter:(Inches) 2.375
Bedding Material: Native Materials Date Construction Completed: 05/30/1973
Maximum Anticipated Operating Pressure (PSI): 500 Testing PSI: 251
Test Date: 04/02/2018

OFF LOCATION FLOWLINE Abandonment Verification

Date: 06/22/2020

Abandonment Verification

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).

(No Jurisdiction)

Description of Abandonment Verification:

A trench was excavated to expose and remove the flowline. Approximately 3,750' of ~2.5" fiberglass pipeline (buried +/- 4' deep) was removed in its entirety. Trench was backfilled and land surface graded.

OFF LOCATION FLOWLINE Realignment, Out of Service, Pre-Abandonment Notice, or Abandonment Verification

Date: 04/23/2020

Description of Realignment, Out of Service, Pre-Abandonment Notice, or Abandonment Verification:

Bell holes were dug along the entire length of the flowline. Approximately 1,077' of ~2.5" steel flowline (buried +/- 4' deep) was be cut and pulled out in segments. Bell holes were back-filled and land surface was graded.

OPERATOR COMMENTS AND SUBMITTAL

Comments This Form 44 is being filed for a Flowline Abandonment. The subject flowline has been removed in its entirety.
00106684FL
- Previously serviced the Box Elder H 1 well (API #05-001-06684).
- Recent PRESSURE TEST attached.
- Updated GIS shapefile attached.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
