## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The extent of impacts will be determined through excavation of impacted soil above COGCC Table 910-1 standards. A third party environmental consultant will collect confirmation soil samples and transport them to a certified laboratory under proper chain of custody procedures for analysis of TPH-DRO, TPH-GRO, BTEX, and Naphthalene.

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Source removal has been completed. Eagle Environmental collected grab confirmation soil samples above the phreatic zone to determine the lateral and vertical extent of impacts. Additional source removal will be conducted subsequent to facility dismantlement and prior to July 1, 2021 pending landowner approval. 30 cubic yards of impacted material was removed in January 2021 during lease road reclamation.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Monitoring wells were installed during groundwater investigation activities. Point of compliance has been achieved. These wells will be sampled on a quarterly basis to monitor for natural attenuation.
