General Comment:

COGCC Inspection Report Summary

On Thursday 5/13/2021 at approximately 1200, I, Inspector Scott Ramsey, conducted a follow up inspection at TEP RMV 83-34, at Location # 334888 in Garfield county Colorado.

While there, I observed normal production operations. All meters have been calibrated on location within the past year. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat and Wildlife Management Area. Also location is within or in close proximity to the 411 water protection area. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad, there is no evidence of a tracking pad at time of inspection. C/A's from previous inspection document # 700701885 have been completed.

During this inspection the following compliance issues were observed:

1. Cut slope shows signs of lack of stabilization
2. BMP's are failing on edge of location (straw bales)

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report.
