General Comment:

This is an environmental inspection in response to spill Document #402679111 reported by Operator on 5/3/2021.

Any corrective actions from previous inspections that have not been addressed are still applicable.

There were no operator or contract environmental personnel on location at the time of this field inspection. Photos attached to document site conditions.

Environmental**Spills/Releases:**

Type of Spill: _____

Estimated Spill Volume: _____

Comment: Impacted material remains in situ (Photo 2), hydrocarbon mixed rainwater was visible on the ground surface (Photo 3) during inspection. Absorbent booms had been placed on the downhill area of the pad (Photo 4). Stormwater controls (Photos 5 and 6) exist adjacent to the spill area which divert rainwater from the wellhead (spill area); no booms or other controls were placed in the diversion area or downstream to protect runoff.

Corrective Action: Operator shall install controls to protect stormwater runoff as soon as practicable. Prior to the closure of the spill, Operator will collect soil samples from the stormwater control basins and the downstream area to ensure impacts did not migrate. CA date reflects due date of Supplemental Form 19.
