

Memo to File:

May 25, 2021

The GMT Marble Redstone Location (ID 479197) was reviewed under SB19-181 Objective Criteria and met Criteria #8 for hydrocarbon storage greater than 5,200 barrels on Location. The Objective Criteria Memo (doc no 1347840) references GMT was working with the local emergency responders but did not have an emergency response plan in place at the time of the Form 2A approval. With the submission of the APDs, OGLA Staff reviewed the GMT Marble-Redstone Location. GMT confirmed an Emergency Response Plan has since been approved by the Rattlesnake Fire Department through the correspondence below. GMT also confirmed the BMP for leak detection includes remote shut-in of the location.

Based on this information, this Location complies with all COGCC Rules and is adequately protective of public health, safety, welfare, the environment, and wildlife resources.

I am unaware of any outstanding requests for more info, so I am just checking to see if there is anything you need or any updates to when these permits might be processed.

Thank you

Justin Garrett

Justin,
I am looking at the Marble-Redstone Form 2A. Has GMT had any success with the local fire district for an emergency response plan? For the remote monitoring of the location, is that on the wells? the tanks?

Thanks,
Rebecca

Rebecca –

Thank you for the review and the questions.

GMT has a Fire Protection and Safety Agreement with the Rattlesnake Fire District for the Marble-Redstone Pad fully executed 2/4/2021 with the agreement Form signed 5/12/2021.

A copy of the Form is attached for reference.

The Marble-Redstone Pad is designed with remote monitoring of the wellheads, process equipment, tanks, and ECD's.

The site will also have the capability to remotely activate an entire facility Emergency Shutdown.

Please let me know if there are any additional questions or information needed.

Thanks again

Justin Garrett
