Operator
Comment:

Once we received the inspection we met with the landowner and the COGCC inspector withing the following week to align on a plan and have recently finished the last step for the corrective actions with seeding. We additionally added a tackifier in efforts to mitigate wind erosion that is common in this area until the growth is able to establish and take place. This location also will be included in our reclamation inspection program and we will be able to be proactive to address concerns that may arise. A fence was also installed around the perimeter to mitigate cattle until growth is established.

COGCC Decision: Approved pending re-inspection

COGCC
Representative:

Approved pending re-inspection of this FIR resolution acknowledges the document was received. It is not an acknowledgement that the corrective action has been passed. A field inspection will be conducted at a future date to evaluate compliance with COGCC standards.
