Comment:

Reclamation activities have been completed, CA Resolved, since previous inspection. Site has been seeded and mulched. Eroding road fill slope has been repaired. Noxious weeds were not noted; Operator has been reporting weed control applications. Final Reclamation Status is now "In Process"

Horses were on site, grazing newly emerged grasses. Operator is aware, this grazing use before vegetation has established, can jeopardize the success of the project; and has been communicating with Surface Owner about rotating horses to other pasture.
