VEGETATIVE COVER \_\_\_\_\_

Comment: **This location does not comply with Rule 1004. The access road is evident and has not been reclaimed. The well location is evident but it appears the location may have been recently seeded, along with the southern reference area. However, the seeding has not taken and is not reflective of reference areas.**

Corrective Action: \_\_\_\_\_ Date **05/25/2021**

Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.

The corrective date is not intended to be the date for which the Operator shall complete the corrective actions but rather the corrective date is the date the location was observed out of compliance.

Well Release on Active Location ☐Multi-Well Location ☐**COGCC Comments**

Comment

User

Date

There is no reclamation variance on file but it appears this location and access road might be utilized by the surface owner. In that event, variances are no longer able to be submitted with a Form 4 Sundry, but now require a hearings application to the Commission per Rules 502 and 510.
