TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: In response to the previous corrective action inspection, Operator has performed final reclamation activities, which include fencing off the well location, access road and associated offsite tank battery. Operator performed interseeding in already established areas that did not have uniform vegetative plant cover. Where there was little or no establishment, Operator seeded and mulched those reclamation areas. Germination of desirable plant species was observed throughout the reclamation areas. Refer to the attached inspection photos.
