COGCC Decision: Approved

COGCC
Representative:

4 ☒ CA# 124960

Corrective Action: Securely fasten all valves, pipes, and fittings to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 605.d.

Date: 11/19/2018

Response: CA COMPLETED

Date of Completion: 05/17/2019

Operator Comment: Oil stained soil has been cleaned up and removed. Fittings of manifold have been inspected and tightened to ensure good mechanical condition per Rule 605.d. See photos.

COGCC Decision: Approved

COGCC
Representative:

5 ☒ CA# 124961

Corrective Action: Net or fence pit to prevent access per rule 902.d.

Date: 05/14/2019

Response: CA COMPLETED

Date of Completion: 05/17/2019

Operator Comment: Historical water pit sock has been replaced. Tumbleweeds in pit have been removed. Hydrocarbon sheen has been addressed. See photos.
Renegade disagrees with this corrective action being issued for no pit fencing or netting. Rule 902.d states that fencing and netting are only required where necessary. Legacy pits with no fencing and netting requirements in the pit permit have NOT been required to install new fencing and netting unless a new issue have made it necessary. This was confirmed via a phone conversation with Mike Leonard and Bob Chesson of the COGCC on 5/23/2019. The COGCC CA matrix for Rule 902.d also refers to fencing or netting required by pit permit.

COGCC Decision: Approved

COGCC
Representative:

OPERATOR COMMENT AND SUBMITTAL

Comment: All oil staining and pit issues addressed. See photos. Renegade disputes the corrective action requirement to fence and net the legacy production pit. This was confirmed per conversation with Mike Leonard and Bob Chesson of the COGCC that the historical interpretation of the rule differs from the interpretation of the field inspector.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
