County: ADAMS
Qtr Qtr: NWNW Section: 11 Township: 3S Range: 64W Meridian: 6
Latitude: 39.808919 Longitude: -104.526881

Description of Corrosion Protection

Axis's corrosion procedures are detailed in its Flowline Management SOP. Coating materials will be used that minimize internal and external corrosion, such as internally coated pipe or stainless steel for water service, and externally coated FBE on all buried steel pipe. If flowlines are repaired due to corrosion, Axis will investigate the failure, promptly respond with the appropriate remedial actions and determine the root cause and apply corrective actions as necessary. Axis retains records of its chemical program in the form of Failure Analysis Reports, records of chemical invoices and chemical delivery.

Description of Integrity Management Program

Axis's integrity management program is detailed in its Flowline Management SOP, which covers flowline installation, operation, maintenance, inspection, testing, and repairs. Prior to beginning any project involving flowlines, Axis ensures the project plans, flowline installation, flowline maintenance (including repairs) and all flowline inspection and testing projects meet the requirements of the Flowline Management SOP. All pressure tests on flowlines will be conducted by an independent, third party qualified to do such testing. Precautions shall be taken to protect employees and the general public.

Description of the construction method used for public by-ways, road crossings, sensitive wildlife habitats, sensitive areas, and natural and manmade watercourses (i.e., open trench, bored and cased, or bored only), if applicable.

N/A.

OFF LOCATION FLOWLINE Abandonment Verification

Date: 11/16/2020

Abandonment Verification

The abandoned Off-Location Flowline was located within the jurisdiction(s) of the following local government(s).

Jurisdiction	County	Municipality
County	ADAMS	

Description of Abandonment Verification:

A trench was excavated to enable the removal of the flowline. Approximately 2,645' of ~3" fiberglass pipeline (buried +/- 4' deep) was removed in its entirety. The trench was backfilled and the land surface graded.

OPERATOR COMMENTS AND SUBMITTAL

Comments This Form 44 is being filed for a Flowline Abandonment. The subject flowline has been removed in its entirety.

00108301FL

- Previously serviced the Champlin 248 Amoco D #2 well (API #05-001-08301).
- Recent PRESSURE TEST is attached.
- Updated GIS shapefile is attached.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
