Comment:

Corrective Action:	<p>There was establishment of desirable species throughout the southern 2/3 of the tank battery location; however, the northern 1/3 is bare ground which appears to be associated with a disturbance post reclamation efforts.</p> <p>There was a locked gate at the northern well location access road so COGCC staff could only inspect the tank battery. COGCC staff called and contacted an Operator representative to discuss the corrective action and the need to coordinate in the future to gain access to inspect the well location.</p> <p>Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Revegetation activities shall be complete no later than 11/30/2021 or as soon as environmental conditions will permit.</p>	Date 11/30/2021
